PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with strong experience engineering scalable, high-performance web applications using React.js, Vue.js, and modern JavaScript (ES6+) alongside backend frameworks like PHP/Laravel. Adept at translating complex Figma designs into responsive, pixel-perfect, and accessible user interfaces while architecting robust backend infrastructures and APIs. Proven expertise in state management, database design, RESTful & GraphQL API integration, and performance optimization. Collaborative team player experienced in Agile methodologies, version control (Git/GitHub), and delivering cross-browser compatible solutions. Maintained a 100% Job Success Score on Upwork, consistently delivering high-quality, scalable products for international clients.

EXPERIENCE

Frontend Developer (Remote)

[Skylimit App](#) – California, USA, *3-Month Contract*

Freelance Frontend Developer

[Upwork – Remote | 100% Job Success Score](#)
